

# Good Health Geek Chemistry at Work™

## Partnership Overview

Prepared for strategic partnership submissions, benefits broker conversations, digital health ecosystem outreach, and enterprise review.

---

## Part 1: Strategic Partnership / RFP Overview

### Executive Summary

Good Health Geek's Chemistry at Work™ program is a workforce performance education platform focused on biological contributors affecting energy, focus, cognitive consistency, and operational reliability.

The program was designed to address a growing issue across modern organizations: fatigue, inconsistency, brain fog, reduced stamina, and performance variability that quietly contribute to operational loss.

Unlike traditional workplace wellness programs that focus downstream on engagement and incentives, Chemistry at Work™ focuses upstream on the biological and behavioral factors influencing daily workforce consistency.

The program combines structured educational media, private at-home screening pathways, and optional nutrition support within a privacy-safe framework designed for employer populations.

### The Problem

Organizations commonly experience operational drag caused by absenteeism, presenteeism, fatigue, reduced cognitive consistency, preventable errors, and fluctuating employee performance.

Many traditional wellness initiatives focus primarily on engagement tools, activity tracking, or generic lifestyle recommendations while overlooking upstream biological contributors that may affect energy regulation, concentration, resilience, and workplace consistency.

Chemistry at Work™ was created to help employers explore a more practical and human-centered approach to workforce wellbeing and performance support.

## Program Overview

Chemistry at Work™ includes:

- Structured discovery video experience
- Companion educational materials
- Private at-home and in-lab screening pathways
- Access to personal nutrition support
- Workforce engagement materials and rollout assets
- Manager participation guidance
- Follow-up educational touchpoints and engagement cadence

The program is designed to be accessible, scalable, visually engaging, and easy to implement within employer environments.

## Privacy & Compliance

Employee privacy is a core component of the Chemistry at Work™ model.

Individual screening results are delivered privately to employees and are not shared with employers or Good Health Geek. Third-party screening and support providers operate independently.

The program is educational in nature and is not intended to diagnose, treat, cure, or prevent disease. Chemistry at Work™ is designed to support workforce education, awareness, and informed lifestyle decision-making.

## Implementation Model

The program is structured to minimize employer burden while maximizing accessibility and participation.

Implementation may include:

- Pre-launch communication sequence
- Educational rollout materials
- Digital access to program content
- Employee participation guidance
- Optional pilot structures
- Periodic engagement follow-ups

The model is adaptable for organizations of varying sizes and industries.

## Strategic Value

Chemistry at Work™ is designed to support conversations surrounding workforce consistency, resilience, focus variability, and operational wellbeing.

Potential organizational value areas include:

- Improved workforce awareness
- Greater employee engagement
- Reduced normalization of chronic fatigue patterns
- Support for healthier workplace routines
- Increased participation in wellbeing initiatives
- Enhanced perception of employer support

The program is intended to complement existing wellbeing and workforce support strategies.

## Partnership Opportunities

Good Health Geek is open to strategic collaborations with:

- Benefits brokers
- Employer groups
- Workforce consultants
- Digital health ecosystems
- Health navigation platforms
- PEOs and HR service organizations
- Pilot program partners

Partnership structures may include pilot implementations, co-branded educational experiences, referral relationships, or ecosystem integrations.

## Company Information

Good Health Geek

Founder: Stephanie Michelle

Location: Denton, Texas
